Little Eagle

Collage

The masters for this project contain visual elements for three different frames from the book. They are to be cut out and pasted onto the background that you paint. To complete the scenes, you have two options:

- 1) Use the B&W masters and color the elements before cutting them out;
- 2) Use the already colored elements masters.

Collage Scenes

- Kwaix finds the first salmon;
- Kwaix brings fish to his tribe;
- Kwaix becomes Little Eagle.

Coloring the B&W masters

- 1) On the computer

You can import the B&W masters into your favorite drawing program and color the cutouts there.

- 2) Manually

Print out the masters as B&W on a heavier paper. Color manually with pencils, watercolor, or crayons.

Assembly of the Scenes

Once you have colored the element parts, cut them out from the master pages. Identify which elements belong to each particular scene

- a) On a letter-size paper draw three different backgrounds for the scenes.
- b) Glue the corresponding collage elements onto the scenes.
- c) Optionally, glue the completed scenes on a larger craft paper backing.
